

Training on Business Group Formation

From August 22-25, 2011, CEDAC provided training on Business Group Formation to the staff members of the Life With Dignity (LWD), a NGO recently localized from Lutheran World Federation (LWF). There were 24 participants (15 of whom were women) who attended this training, including a project officer, M&E officer and capacity building advisor. The training aimed to build the knowledge and skills of participants in community-based, business group formation, so that they will be able to implement their Agriculture Cooperative program more effectively. The training contents included the basic principles and process of business group formation, value chains and business plan preparation.

It is worth noting that CEDAC signed a training contract with LWD for providing their staff members with training on Community-based Micro-business Management, which is part of their Agriculture Cooperative program.
